MONTANA'S ANNUAL REPORT ON ECIA, CHAPTER 2

PLEASE RETURN

for

The 1988-89 School Year

March 1990

Montana State Library
3 0864 1006 2812 5

FOREWORD

This report is the final annual report for the Chapter 2 programs supported under the Education Consolidation and Improvement Act of 1981 (ECIA), P.L.97-35, implemented in Montana during the 1988 - 1989 school year.

The Montana Office of Public Instruction (OPI) has prepared this report in compliance with ECIA, Section 564(a)(5) which states ... "beginning with fiscal year 1984, provides for an annual evaluation of the effectiveness of programs assisted under this chapter, which shall include comments of the advisory committee, and shall be made available to the public."

Information contained in this report has been summarized from SEA information, and LEA project evaluation reports. Complete records on ECIA, Chapter 2, are maintained in OPI's Department of Curriculum Services.

This year's project evaluation reports verify that ECIA Chapter 2 continues to be a valuable program in supplementing LEA educational services. The LEAs especially appreciate the flexibility of Chapter 2 funds which allows local planners to better meet the needs of their schools. The ECIA Chapter 2 program requires a minimum of paper work which makes the program popular with local

administrators.

The format for this report follows the guidelines suggested in National Research and Evaluation Agenda, ECIA Chapter 2, published by the Southeastern Regional Council for Educational Improvement.

I. GENERAL IMPACT STATEMENT

The ECIA Chapter 2 is a very popular federal program in Montana. More Montana school districts participate in Chapter 2 than in all of the antecedent programs combined. Traditionally, public school districts have had an exceptionally high participation rate in Chapter 2. In fact, participation increased from 93.6 percent for the 1987-88 school year to 95.9 percent during the 1988-89 school year.

Chapter 2 is so well liked because it is easy to administer and has the flexibility to meet educational needs unique to each school district which otherwise would not be affordable. Most school districts in Montana feel that Chapter 2 has been the primary source of school improvement. Without the program, schools in Montana would be in a rut, struggling to maintain quality of education.

II. CHAPTER 2 PROGRAM MANAGEMENT

SEA Level

Administration of ECIA Chapter 2 during the 1988-89 school year

changed hands. The previous State Superintendent, Ed Argenbright headed the SEA and his Assistant Superintendent, Francis Olson, directed the program through December 31, 1988. The current State Superintendent, Nancy Keenan, took office on January 3, 1989 and assigned surpervision of the Chapter 2 program to Claudia Clifford.

Under ECIA, the SEA allocated funds using a formula based on four factors: 1) enrollment; 2) low income; 3) sparsity; and 4) tax effort. Appendix B depicts the impact of the allocation formula on the schools of Montana.

Montana's SEA retains the entire 20 percent of the Chapter 2 allocation set-aside for state use. The Chapter 2 State Advisory Council reviewed the state plan for use of the 20 percent set-aside during its annual meeting on May 26, 1988. As in the past, the State Advisory Council recommended that the SEA use local district Chapter 2 expenditures as a guide for the use of state set-aside funds.

Primarily, the SEA used its funds to administer the program, and to provide technical assistance and professional development opportunities in a variety of curriculum areas. The SEA provides technical assistance to the LEAs throughout all the procedural steps of administering Chapter 2. The SEA also provides special

assistance to local administrators to assure that non-public schools are given access to Chapter 2 funds.

LEA Program Management

LEAs designate an authorized representative (AR) to oversee the local Chapter 2 program and to be a contact for the SEA. Some LEAs have directors who manage Chapter 2 funded programs and report to the authorized representative. In school districts, the AR is designated by the Chair of the Board of Trustees. For LEAs other than school districts, an authority with legal status to designate, like the Director of the Department of Institutions, chose the AR.

The application process for Chapter 2 is generally perceived as simple and easy to complete. Districts had total discretion in the selection of programs from the three available sub-chapters. Separate project plans are submitted for the public school district and each non-public school.

Project records include a breakdown by percentage of the total allocation within each program, a compliance agreement signed by the Chairperson of the Board of Trustees, and information on enrollment and participation status from each non-public school within the boundaries of the public school. Districts are required

to report separately on public versus non-public expenditures for Chapter 2.

III. LEA FLOW-THROUGH PROGRAM

Strengths

Chapter 2 in Montana schools during year seven of the block Grant (1988-89 school year) continued to have an extraordinarily high level of participation among eligible LEAs.

Under ECIA, Montana's allocation formula was based on four factors: 1) enrollment; 2) low income; 3) sparsity; and 4) tax effort. Appendix B depicts the impact of the allocation formula on the schools of Montana.

As already discussed, the most notable strengths of the flow-through program are the flexibility in the use of funds and the minimal paper work. These strengths are evident in the continued extraordinarily high level of participation among eligible LEAs. Of the eligible public school districts, 95.9 percent participated in the Chapter 2 program for the 1988-89 school year. Participation increased 2.3 percent from the previous school year.

LEA Program Selections

Appendix A contains a statewide summary of LEA program selections. As in prior years, most of the programs selected, and 88.5 percent of the funds budgeted, were in Subchapter B, Educational Improvement and Support Services. Only 4.1 percent of funds were budgeted in Subchapter A and 7.5 percent in Subchapter C. The largest amount of money was budgeted for instructional equipment which continues to fund the purchase of computer hardware. Staff development and library resources and software were the next most popular categories. The funds in these top categories are 81 percent of the total allocation and clearly represent the priorities for school improvement in Montana.

There is still an emphasis on hardware for computerization, but the installation of satellite systems gained popularity particularly in small and/or isolated schools. Also, as the students became more proficient on computers, the need for teacher training and staff development was recognized.

The most significant shift in use of Chapter 2 funds was a 66.5 percent increase in teacher training and staff development programs over the previous school year. The largest decrease in budgeted funds was in the category of library resources and computer

software. It appears priorities have shifted and more Montana schools see a need for their teachers to be kept abreast of the lastest developments in their fields.

One of the most exciting and important developments for Montana schools has been the development of distance learning made possible with Chapter 2 funds. In a sparsely populated state, like Montana, distance learning is the key to improving educational quality as many schools are discovering. With the purchase of satellite dishes and other equipment, schools are able to offer special courses to advance placement and at-risk students.

Chapter 2 can be credited with bringing Montana schools into the twentieth century. Chapter 2 will make possible the development of distance learning as our rural schools attempt to offer a more diverse curriculum, enrich basic courses, and meet specialized needs of students.

Sample Narrative Responses from LEA Evaluation of Chapter 2 Programs

LEA evaluation requirements for Chapter 2, in addition to complete fiscal accounting of expenditures, include a narrative summary of the program.

A sample of responses to the three evaluation questions follows:

Question: Briefly describe problems or concerns, if any, experienced in the local administration or implementation of the Chapter 2 program.

1. "We have had few problems. We have done alot of strategic planning in the district with lots of staff/public in-put, so establishing how we would use the Chapter 2 monies has been relatively easy." - Paul Stebbins, Superintendent, Libby Public Schools.

2. "The biggest problem involves identifying, contracting, providing information, etc., to the 'home schools' in our district. This year (1988-89), a family indicated that they wished to participate. Please note their portion of the Chapter 2 funds are being returned. They never requested services. I understand the home schools have a right to access to these [programs] .... but it's a lot of work that we really don't need in the public schools." - John Baule, Superintendent, Noxon Schools.

3. "My biggest problem in administering Chapter 2 monies is when I estimate the [budget]. It seems I always have major revisions or adjustments to the budget later on in the year, needing more

money in one category and not as much in another. This is just a matter of better anticipating on the local level." Donald R. Waldron, Superintendent, Hellgate Elementary School District.

4. "The Chapter 2 program is not difficult to administer. The monthly reports required more time and I feel the quarterly reports will be sufficient." Marilyn Vukonich, Administrative Assistant, Joliet School District #4.

5. "The items acceptable for purchasing are confusing." - Sister Helen Duron, Administrator, St. Paul's Mission School.

6. "We have no problems with the local administration of the Chapter 2 program. The monies we receive are graciously received." - Gary Scott, Superintendent, Harlowtown School District #16.

Question: What evidence (surveys, test scores, parent comments, board minutes,etc.) describes the impact of Chapter 2 on local school programs?

1. "The primary measure is the improved teacher performance of individual staff members as a result of staff development activities or workshops. Through the district's supervision/evaluation, data is gathered on teacher performance.

All indications point to improved performance in the area targeted by the inservice." - Al McMillin, Superintendent, Victor School District.

2. "We have seen the number of students eligible for Chapter 1 in math decrease from 31% to 15%. We attribute this to increased inservice, but also to enrichment materials, some of which were purchased with Chapter 2 funds." - Lois Sindelar, Principal, Independent School.

3. "Our program incorporated the Great Books Series into the library and language arts program. Pre-test of literary knowledge was administered before the program. The post test scores indicated an improvement of literary awareness." - John Dallum, Superintendent, Cascade School District.

4. "Chapter 2 funds have made it possible for students to use computers, and improve the instructional opportunities for our staff. Teachers and students alike have commented on the improvements in our school that would have been impossible without Chapter 2 funds." - Gary Scott, Superintendent, Harlowton School District.

5. "In our community, several past students have gone on to graduate from high school to receive high scholastic honors and scholarships. We feel this is an excellent example of providing a good beginning in an education. With Chapter 2 funding, we are able to give our students the extra in their education. One example is purchasing a computer and various software for it. Our students go from a two-room school with up to date knowledge to the larger schools." - Kathy Berg, Clerk, Lennep School District.

6. "We have had many public comments by parents and teachers about the use of Chapter 2 funds for our local school programs. This is reflected in minutes by the Board and also in the newspaper." - Penny O. Bertelsen, Superintendent, Fromberg Elementary School District.

Question: Please provide recommendations or comments regarding administration of the Chapter 2 program. Also include recommendations for technical assistance.

1. "Assistance provided upon request has revealed that Program Administrative Personnel are competent, decisive and congenial. It has been our experience that Program Staff are highly supportive of our efforts to carry out responsibilities." Ervin Winslow, Assistant Superintendent, Helena Schools.

2. "I have had to call upon the state administration concerning the Chapter 2 funds recently and I was treated in a very courteous manner and my questions were answered promptly." Patrick Gibbs, Chair, School Board, Van Norman School District.

3. "The staff of OPI is to be commended for their assistance." Rodney Svee, Superintendent, Hardin Schools.

4. " I appreciate the clear and concise application and report forms that can be filled out in a few minutes for a small program such as ours." - Alice Pehl, Prairie County Superintendent.

5. "Let projects know, realistically, when they might receive the funds relative to request. Otherwise, you do a commendable job of assistance. The new forms and procedures presented in May should tighten up accountability and insure planning." - Lois Sindelar, Principal, Independent School.

6. "State administration of the program is characterized by an attitude that is cooperative and collaborative. We hope this will continue in the future and that new regulations will not make the program overly complex." - Joel Voytoski, Superintendent, Geyser School District.

IV. STATE SET-ASIDE PROGRAMS

Strengths

The state agency benefits from the flexibility of the 20 percent set-aside funds to address educational needs particular to Montana schools. Specialized technical assistance is provided to school districts in a variety of curriculum areas: math, science, technology education, foreign languages, music and art, and gifted and talented. Special projects funded by the state set-aside included support for a specialist and activities to improve services for at-risk students, and a program to improve administrative practices in the school districts.

State set-aside funds totalled $473,616 or 20 percent of the state grant award. Dollars were first appropriated by the State Legislature and individual budgets then assigned to various departments of the agency. Set-aside funds in Montana were utilized for the following purposes during 1988-89:

PURPOSE	PERCENT OF SET-ASIDE
1. Costs related to administration of Chapter 2 flow-through funds to LEAs.....	16%
2. Services to LEAs (curriculum technical assistance, publications and materials, staff development, etc.)	84%

V. FACTORS LIMITING MAXIMUM EFFECTIVENESS

The final narrative evaluation forms submitted by the LEAs at the end of the 1987-88 school year reflect, once again, overwhelming satisfaction with the administrative procedures of Chapter 2. The LEAs especially appreciate the minimal paper work and the flexibility of funds. The SEA was able to provide technical assistance which even elicited compliments from the LEAs.

Most complaints from the LEAs regarding administration of Chapter 2 are directed at home schools. The LEAs are required to explain the program to all non-public schools. The LEAs have a difficult time getting a response from home schools because of their general suspicion of "government." The SEA made two changes to help ease the difficult communication between LEAs and non-public schools. LEAs now have a single application form and explanation document for all federal programs available to non-public schools, thereby relieving the hassles of obtaining separate responses on each federal program from every non-public school. In addition, LEAs are no longer required to get an actual response, but only to show proof that the federal program information was sent to the non-public school by certified mail.

FINAL ALLOCATIONS FOR 1988-89

Amounts allocated to Montana school districts under the Education Consolidation and Improvement Act, Chapter 2, are listed below. Federal regulations govern the allocations which are computed using a formula composed of four factors: 1) enrollment of children in PUBLIC and NONPUBLIC schools; 2) numbers of children from low-income families; 3) a sparsity factor affecting those districts with an enrollment of less than 100; and 4) district tax effort based on general fund mills and discretionary funding as measured by voted amount per ANB.

Funds will be deposited in Fund 23: Block Grant Type B. ALL districts must request funds as needed on the form provided. There are no automatic deposits.
